

BLAST OFF INTO 2021

WATER ROCKET DIRECTIONS

Now that you've watched the water rocket lesson, here's a follow-up activity just for you! Research, design and create your own water rocket! Then USAFA and Space Foundation will launch it INTO THE NEW YEAR! We'll record launch day and you can view it here: <https://www.discoverspace.org/>.

First: Build your rocket. The rocket must follow these requirements:

- The chassis (body of the rocket) **MUST** be a 2-Liter, PEPSI product bottle to fit on the launcher (Coke bottles are a little too small).
- You can design and modify the outside and top of the bottle to make it your own!

Second: Get your model to the Space Foundation:

- You have until 31 December 2020 to get your rocket to Space Foundation Discovery Center.
- You can drop it off or mail them to us at:
Space Foundation Discovery Center, Attn: Jodie Guillen
4425 Arrowswest Drive, Colorado Springs, CO 80907

We're looking forward to seeing some great water rockets to blast us into 2021!!!
